Summary

I'm currently seeking a full-time role in full-stack or back-end development. I graduated from Syracuse University with a M.S. in Cyber Security and Computer Science, with 2.5+ years of professional experience in backend engineering and mobile development.

Experience

SOFTWARE DEVELOPMENT ENGINEER | AWS | SEATTLE, WA | JULY 2022 - PRESENT

- Architected and developed backend solutions for the **AWS Console Mobile App**, creating new APIs and enhancing app functionality.
- Led the development of a new and improved **Services page**, increasing services displayed from 23 to 35, which boosted iOS traffic by **94%** and Android traffic by **83%**.
- Launched the **Universal Linking** feature for seamless navigation to AWS resources within the app, resulting in an **88%** increase in iOS traffic and a **94%** increase on Android.
- Utilized **Java**, **Kotlin**, and **Swift** with **Android Studio** and **Xcode** for development and testing, along with **Ruby** for Cucumber testing for various APIs and scenarios

COMPUTER SYSTEM ANALYST | STANLEY LAW | SYRACUSE, NY | JUNE 2021- JUNE 2022

- Worked with senior partners for **IT security planning** of the firm and implementation of scheduled sustainment tasks, **SSL certificate renewals**, software updates and other security updates to ensure data privacy.
- Successfully **troubleshoot and resolved operational and technical issues** by accessing business impact, identifying the root cause, to facilitate timely remediation of systems and failures
- Published weekly reports for the **Critical deadlines** of the firm to ensure that the requirements or necessary steps are being taken before the deadline has been approached.

STUDENT SUPERVISOR | SYRACUSE UNIVERSITY | SYRACUSE, NY | JAN 2021- MAY 2021

- Supervised monitored performance and prompted corrective feedback to the **team of 20** on the compliance of standards.
- Looked after the **administrative** and **payroll** functionalities and was responsible for the daily operations of the dining facility.
